77. Maintenance Bond.

Before final payment is made, the Contractor shall furnish a Surety Corporation Maintenance Bond as allowed by NJSA 40A:11-16.3b to the Owner in a sum equal for fifteen percent (15%) of the final contract amount and such Bond shall remain in full force and effect for a period of two (2) years from the date of acceptance of the work. The Bond shall work to the satisfaction of the Public Works Manager without cost to the Owner.

If during the two-year period, any work should be found to be defective, the Township shall order in writing, the repair of such work. The repairs shall be undertaken within twenty-four (24) hours of the written notice and work shall be continuous, during regular working hours, until the replacement or repair is completed. If the Contractor fails to perform or fails to continue to perform the necessary repair the Township may cause such work to be corrected and the cost thereof shall be paid by the Contractor or his Surety before the Bond will be released.

The Contractor is not obligated to repair any work that he may prove, to the satisfaction of the Public Works Manager, has resulted from abuse of the work by parties other than the Contractor.

If the Township puts to use any portion of the work prior to the final payment, the maintenance period for such portion of the work shall still be considered from the date of acceptance.

78. The successful bidder shall begin work on the start work date required in the specification and the successful bidder shall remain in Wyckoff performing the milling and road resurfacing work until all the work is completely complete. The successful bidder shall not be allowed to stop work in Wyckoff and begin work in another municipality or for a private client until the work required in this specification is completed.

79. Standardized Changed Condition Clauses:

I. Differing Site Conditions:

The law defines "differing site conditions" as the physical conditions at the contract work site that are subsurface or otherwise concealed and which differ materially from those indicated in the contract documents or are of such an unusual nature that the conditions differ materially from those ordinarily encountered and generally recognized as inherent in the work of the character provided for in the contract.

All construction contracts must include the following differing site conditions provisions:

- If the contractor encounters differing site conditions during the progress of the contract work, the contractor must promptly provide written notification to the contracting unit of the specific differing site conditions encountered before the site is further disturbed and before any additional work is performed in the impacted area
- Upon receipt of differing site conditions written notice or upon the contracting unit otherwise learning of differing site conditions, the contracting unit must promptly undertake an investigation to determine whether differing site conditions are present.

Section I (continued)

- If the contracting unit determines that different site conditions may result in additional cost or delays, the contracting unit shall provide prompt written notification to the contractor containing directions on how to proceed.
 - The contracting unit must make a fair and equitable adjustment to the contract price and contract completion date for increased costs and delays resulting from the agreed upon differing site conditions encountered by the contractor.
 - If both parties agree to the contracting unit's investigation and directions decrease the contractor's costs or time, the contracting unit is entitled to fair and equitable downward adjustment to the contract and price
 - If the contracting unit determines that there are no differing site conditions present that would result in additional costs or delays, the contracting unit must notify the contractor, in writing, and the contractor must resume performance of the contract, and be entitled to pursue a differing site conditions claim against the contracting unit for additional compensation or time attributable to the alleged differing site conditions.
- Contract execution by the contractor constitutes a representation that the contractor has visited the site and has become generally familiar with the local conditions under which the work is to be performed.

II. "Suspension of Work"

Contract must include the following suspension of work provisions:

- The contracting unit must provide advance written notice to the contractor of any suspension of work lasting more than 10 calendar days of the performance of all or any portion of the work of the contract.
- If the performance of all or any portion of the work of the contract is suspended by the contracting unit for more than 10 calendar days due to no fault of the contractor or as a consequence of an occurrence beyond the contracting unit's control, the contractor shall be entitled to compensation for any resultant delay to the project completion or additional contractor expenses, and to an extension of time, provided that, to the extent feasible, the contractor, within 10 calendar days following the conclusion of the suspension, notifies the contracting unit, in writing, of the nature and extent of the suspension of work.
 - The notice must include available supporting information, which information may thereafter be supplemented by the contractor as needed and as may be reasonably requested by the contracting unit.
 - Whenever a work suspension exceeds 60 days, upon seven days' written notice, either party shall have the option to terminate the contract for cause and to be fairly and equitably compensated therefor.

Section I (continued)

- Upon receipt of the contractor's suspension of work notice, the contracting unit must promptly evaluate the contractor's notice and promptly advise, in writing, the contractor of its determination on how to proceed.
 - If the contracting unit determines that the contractor is entitled to additional compensation or time, the contracting unit must make a fair and equitable upward adjustment to the contract price and contract completion date.
 - If the contracting unit determines that the contractor is not entitled to additional compensation or time, the contractor shall proceed with the performance of the contract work and is entitled to pursue a suspension of work claim against the contracting unit for additional compensation or time attributable to the suspension.
- Failure of the contractor to provide timely notice of a suspension of work will result in a waiver of a claim if the contracting unit can prove by clear and convincing evidence that the lack of notice or delayed notice by the contractor actually prejudiced the contracting unit's ability to adequately investigate and defend against the claim.

III. "Change in Character of Work"

The law defines "material change" as a character change which increases or decreases the contractor's cost of performing the work, increases or decreases the amount of time by which the contractor completes the work in relation to the contractually required completion date or both.

Contract must include the following material change provisions:

- If the contractor believes that a change directive by the contracting unit results in a material change to the contract work, the contractor must notify the contracting unit in writing. The contractor must continue to perform all work on the project that is not the subject of the notice.
- Upon receipt of the contractor's change in character notice the contracting unit shall promptly evaluate the contractor's notice and promptly advise the contractor of its determination on how to proceed in writing.
- If the contracting unit determines that a change to the contractor's work caused or directed by the contracting unit materially changes the character of any aspect of the contract work, the contracting unit must make a fair and equitable upward adjustment to the contract price and contract completion date. The basis for any such price adjustment shall be the difference between the cost of performance of the work as planned at the time of contracting and the actual cost of such work as a result of its change in character, or as otherwise mutually agreed upon by the contractor and the contracting unit prior to the contractor performing the subject work.
- If the contracting unit determines that the contractor is not entitled to additional compensation or time, the contractor must continue the performance of all contract work and is entitled to pursue a claim against the contracting unit for additional compensation or time attributable to the alleged material change.

Section I (continued)

IV. “Change in Quantity”

The law defines “bid proposal quantity” as the quantity indicated in the bid proposal less the quantities designated in the project plans as “if and where directed.”

Contract must include the following change in quantity provisions:

- Contracting unit may increase or decrease the quantity of work to be performed by the contractor
- If the quantity of a pay item:
 - Is cumulatively increased or decreased by 20% or less from the bid proposal quantity, the quantity change is considered a minor change in quantity.
 - The contracting unit must make payment for the quantity of the pay item performed at the bid price for the pay item
 - Is cumulatively increased or decreased by more than 20% from the bid proposal quantity, the quantity change is considered a major change in quantity.
- For major increase:
 - the contracting unit or the contractor may request to renegotiate the price for the quantity in excess of 120% of the bid proposal.
 - If mutual agreement cannot be reached the contracting unit must pay the actual cost plus an additional 10% for overhead and additional 10% for profit **unless otherwise specified in the original bid.**
- For major decrease:
 - The contracting unit or the contractor may request to renegotiate the price for the quantity of work performed
 - If mutual agreement cannot be reached the contracting unit must pay the actual cost plus an additional 10% for overhead and additional 10% for profit **unless otherwise specified in the original bid.** Provided that the contracting unit does not make a payment in an amount that exceeds 80% of the value of the bid price multiplied by the bid proposal quantity.

83. Termination of Contract.

- A. If, through any cause, the contractor shall fail to fulfill in a timely and proper manner obligations under the contract or if the contractor shall violate any of the requirements of the contract, the owner shall there upon have the right to terminate the contract by giving written notice to the contractor of such termination and specifying the effective date of termination. Such termination shall relieve the owner of any obligation for balances to the contractor of any sum or sums set forth in the contract. Owner will pay only for goods and services accepted prior to termination.
- B. Notwithstanding the above, the contractor shall not be relieved of liability to the owner for damages sustained by the owner by virtue of any breach of the contract by the contractor and the owner may withhold any payments to the contractor for the purpose of compensation until such time as the exact amount of the damage due the owner from the contractor is determined.

Section I (continued)

- C. The contractor agrees to indemnify and hold the owner harmless from any liability to subcontractors/suppliers concerning payment for work performed or goods supplied arising out of the lawful termination of the contract by the owner under this provision.
- D. In case of default by the contractor, the owner may procure the goods or services from other sources and hold the contractor responsible for any excess cost.
- E. Continuation of the terms of the contract beyond the fiscal year is contingent on availability of funds in the following year's budget. In the event of unavailability of such funds, the owner reserves the right to cancel the contract.

84. Payment shall be made after:

- 1) The Township Inspector, Mr. Fisher reviews and verifies tabulated totals for the total amount of square yards of milling.

The contractor or subcontractor, where applicable, will not discriminate against any employee or applicant for employment because of age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Public Agency Compliance Officer setting forth provisions of this nondiscrimination clause.

The contractor or subcontractor, where applicable will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex.

When hiring or scheduling workers in each construction trade, the contractor or subcontractor agrees to make good faith efforts to employ minority and women workers in each construction trade consistent with the targeted employment goal prescribed by N.J.A.C. 17:27-7.2; provided, however, that the Dept. of LWD, Construction EEO Monitoring Program, may, in its discretion, exempt a contractor or subcontractor from compliance with the good faith procedures prescribed by the following provisions, A, B, and C, as long as the Dept. of LWD, Construction EEO Monitoring Program is satisfied that the contractor or subcontractor is employing workers

The contractor or subcontractor agrees that a good faith effort shall include compliance with the following procedures:

(A) If the contractor or subcontractor has a referral agreement or arrangement with a union for a construction trade, the contractor or subcontractor shall, within three business days of the contract award, seek assurances from the union that it will cooperate with the contractor or subcontractor as it fulfills its affirmative action obligations under this contract and in accordance with the rules promulgated by the Treasurer pursuant to N.J.S.A. 10:5-31 et. seq., as supplemented and amended from time to time and the Americans with Disabilities Act. However, a contractor or subcontractor shall determine that the individual at least possesses the requisite skills, and experience recognized by a union, apprentice program or a referral agency, provided the referral agency is acceptable to the Dept. of LWD, Construction EEO Monitoring Program. If necessary, the contractor or subcontractor shall hire or schedule minority and women workers who qualify as trainees pursuant to these rules. All of the requirements, however, are limited by the provisions of (C) below.

EXHIBIT B (Cont)

(C) The contractor or subcontractor agrees that nothing contained in (B) above shall preclude the contractor or subcontractor from complying with the union hiring hall or apprenticeship policies in any applicable collective bargaining agreement or union hiring hall arrangement, and, where required by custom or agreement, it shall send journeymen and trainees to the union for referral, or to the apprenticeship program for admission, pursuant to such agreement or arrangement. However, where the practices of a union or apprenticeship program will result in the exclusion of minorities and women or the failure to refer minorities and women consistent with the targeted county employment goal, the contractor or subcontractor shall consider for employment persons referred pursuant to (B) above without regard to such agreement or arrangement; provided further, however, that the contractor or subcontractor shall not be required to employ women and minority advanced trainees and trainees in numbers which result in the employment of advanced trainees and trainees as a percentage of the total workforce for the construction trade, which percentage significantly exceeds the apprentice to journey worker ratio specified in the applicable collective bargaining agreement, or in the absence of a collective bargaining agreement, exceeds the ratio established by practice in the area for said construction trade. Also, the contractor or subcontractor agrees that, in implementing the procedures of (B) above, it shall, where applicable, employ minority and women workers residing within the geographical jurisdiction of the union.

While completion of Form WH-347 is optional, it is mandatory for covered contractors and subcontractors performing work on Federally financed or assisted construction contracts to respond to the information collection contained in 29 C.F.R. § 3.3, 5.5(a). The Copeland Act (40 U.S.C. § 3145) requires contractors and subcontractors performing work on Federally financed or assisted construction contracts to "turnish weekly a statement with respect to the wages paid each employee during the preceding week." U.S. Department of Labor (DOL) regulations at 29 C.F.R. § 5.5(a)(3)(ii) require contractors to submit weekly a copy of all payrolls to the Federal agency contracting for or financing the construction project, accompanied by a signed "Statement of Compliance" indicating that the payrolls are correct and complete and that each laborer or mechanic has been paid not less than the proper Davis-Bacon prevailing wage rate for the work performed. DOL and Federal contracting agencies receiving this information review the information to determine that employees have received legally required wages and fringe benefits.

Public Burden Statement

We estimate that it will take an average of 55 minutes to complete this collection, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. If you have any comments regarding these estimates or any other aspect of this collection, including suggestions for reducing this burden, send them to the Administrator, Wage and Hour Division, ESA, U.S. Department of Labor, Room S3502, 200 Constitution Avenue, N.W., Washington, D.C. 20210
