

TOWNSHIP OF WYCKOFF, NJ

Environmentally Sustainable Best Practices

A photograph of a wooden rain barrel with metal bands, partially filled with water. It is connected to a metal downspout from a house. The barrel is situated in a lush garden with various plants, including red flowers and large green leaves. A blue text box is overlaid on the right side of the image.

Consider installing a rain barrel or container garden. These prevent overflow of storm water and sewage into our waterways.

Only Rain in the Drain!
